如何跟上前端开发的最新前沿

# 前端开发

前端开发的技术进步很快. 前端开发者的重要职责之一 是了解最新推出的工具, 最新的潮流以及开发流程.

每天都有成千上百的前端文章发布出来, 你不可能把他们全读了. 我们认为你应该用聪明的方法来跟上最新的方向, 因此我们创建了这个"食谱"

照着这些简单步骤做

- 1 关注大牛
- 2 经常看这些好网站
- 3 参加各种会议
- 4 总结出自己的学习方法

# 1

## 关注 大牛

前端界的牛人们会讨论最新的方向和各类东西.

推特也可以成为了解最新前端方向的好地方

## 看最好的 资讯

以下是一些很棒的前端开发相关站

博客

**DailyJS**

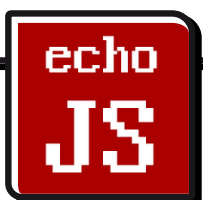

A JavaScript Blog.

**The Morning Brew**

A Daily .NET Software Development Link Blog.

**Treehouse Blog**

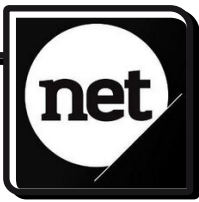

The Treehouse blog provides valuable content on web development, web design, and startup tips.

**EchoJS**

A HackerNews-like site dedicated to JavaScript and Front-end

News.

### .net Magazine

.net is the world's best-selling magazine for web designers and developers.

### Web Platform

An open community of developers building resources for a better web.

### HTML5 ROCKS

Posts, tutorials, case study & demos.

### HTML5 Doctor

A blog to help you learn more about HTML5.

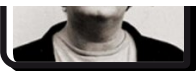

### Nettuts+

Tutorials, articles, tips, and community for web developers.

### QuirksMode

It is the prime source for browser compatibility information on the Internet.

## CSS-TRICKS

A web design community.

## CSS Wizardry

A specialised blog in writing and scaling CSS for large apps and websites.

## Smashing Magazine

An online magazine for professional Web designers and developers.

## 24 ways

Geeks publish a daily dose of web design and development.

## A List Apart

Design, development, and web content, focused on standards and best practices.

## JSCentral

JavaScript news and links.

## JSGoodies

Mainly web-focused; in particular, most are JS-focused.

## SitePoint

An online media company providing cutting-edge content for web professionals.

[看全列表](#)

每周一封资讯邮件

## Open Web Platform Daily Digest

Provides daily content about W3C, HTML, CSS, JavaScript, the Web APIs, web browsers.

## Web Design Weekly

Pure awesome links to the best news and articles to hit the interweb during the week.

### CSS Weekly

Roundup of css articles, tutorials, experiments and tools.

### HTML5 Weekly

Round-up of HTML5 and browser technology news and links.

### Responsive Design Newsletter

Round-up of responsive design articles, tools, tips, tutorials and inspirational links.

### JavaScript Weekly

A free, once-weekly e-mail round-up of JavaScript news and articles.

### Front-end Rapport

Weekly front-end news and updates from the Lullabot team.

## A Drip of JavaScript

One quick JavaScript tip, delivered to your inbox every other week.

## Mobile Web Weekly

Releases, articles, and links that affect developers working on the mobile Web.

## Web Development Reading List

A handcrafted, carefully selected list of web development related resources.

## Web Operations Weekly

A weekly newsletter on Web operations, infrastructure, performance and tooling.

[看全列表](#)

播 客

## Shoptalk

A podcast about front end web design, development and UX.

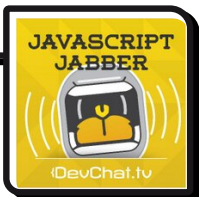

### The Hanselminutes

Hanselminutes Podcast is "Fresh Air" for developers.

### The Big Web Show

The award winning Big Web Show features special guests and topics. It's everything web that matters.

### JavaScript Jabber

A weekly podcast discussing the superb language JavaScript.

### The Web Ahead

A weekly podcast about changing technologies and the future of the web.

### Five Minutes of JS

The latest news in the JavaScript community.

## Responsive Web Design Podcast

A Responsive Web Design Podcast, co-hosted by @karenmcgrane and @beep.

## 参加会议

无数的开发者参加各种会议来推广最新的技术, 分享他们的看法和经验, 同时也从其他人身上互相学习. 你也应该参加这些会议来认识些牛人.

## Fronteers conference

## Front Trends

A gathering where front-end lovers and tech entrepreneurs discover the latest trends.

## HTML5DevConf

Has become the largest JavaScript and HTML5 developers

conference in the world.

### Fluent Conf JavaScript & Beyond

Featuring the best in JavaScript and progressive Web development.

### Front End Ops Conf

A 2-day conference in San Francisco dedicated to the emerging discipline of front end operations.

### ColdFront

ColdFront is a one-day front-end conference in Copenhagen.

## 总结出自己的 学习方法

总结出一套自己的方法来跟上最新方向是很重要的. 来看看这些厉害的开发者们是怎么做的吧!

I follow people on Twitter who produce new things. Some people like to follow just blogs, but I like to see what the people who make things recommend. My Twitter feed has sort of replaced my old RSS feed to some extent - I am way more likely to read an article recommended by someone who I see posting their repos alongside it. That kind of behavior tells me that the person is both an active developer and someone who thinks about their craft in most cases.

I'm trying to spend more time on various W3C working group and specification mailing lists. There is a lot that goes over my head about the specific implementations of features that as a web developer I would take for granted every day. Sometimes keeping up is challenging, but I like a good challenge and as I stick around I learn more and more so I can ideally contribute more to the discussion in the future.

There is a saying that goes around: "If you feel like you are the smartest person in the room, you're in the wrong room." Surround yourself with people who are intelligent but not cocky about it.

Angelina Fabbro

“

我推荐读以下3个资源来跟上最新发展.

一, 推特. 先关注些你认识的知名前端开发者, 比如你经常用的某个库的作者. 然后从他的关注列表里面去挖掘, 迟早你会看到一些有用的推特.

二, [Echo JS](#) 是个 [JavaScript](#) 新闻站. 它的布局和 [Hacker News](#) 类似.

三, 关注这些 [每周邮件](#) (那啥: 我是 [JavaScript](#) 每周新闻的编辑).

Axel Rauschmayer

“

我发现对我来说, 只有不断实践才能跟上最新发展.

我在推特上关注了很多前端界的人, 也读博客和编程界新闻, 但我发现实践比纯读更能学到东西.

当我想学一样东西的时候, 我就直接开始做项目, 然后从中不断学习, 理解核心概念.

为了知道前端界都在发生些什么, 我经常刷推特和 G+.

对于那些我经常使用的工具和库, 我会关注下作者的最新情况, 这样才能知道接下来会有什么发展.

关注下那些制定网络标准的人也很有好处, 这样你才能知道接下来的几年会有什么发展.

Addy Osmani

1. 有几个订阅源(feeds) 我天天都读
2. 我关注了很多, 包括 Web 标准的制定者, 以及开发浏览器的, 还有厉害的其他类别的开发者.
3. 我偶尔会阅读标准, 有些很好理解而且是一手资讯, W3C邮件列表(W3C mailing lists) 也很有帮助: 你在新技术出现的那一刻就能开始学习他们, 甚至你可以影响到这些新技术的发展!
4. 参加会议

Lea Verou

I keep up with front-end technologies religiously. As part of my daily activities, I spend 20 to 30 minutes reviewing twitter and RSS feeds, investigating anything that sparks my interest.

I am also regularly reading (books), watching (videos), or writing about my practice. From time to time I pick a coding, or writing, project and focus all of my spare time in this area. When I tire of writing words or code I simply spend time reading code.

When I'm feeling burnt out I'll attend a conference so that I can be inspired by ideas and people. And when I am really bored I start looking into practices that cross over into my area of expertise.

The secret to keeping up is not to view it as an extra chore, but instead as part

of the job I've chosen.

Cody Lindley

- [chromium blog](#)
- [HTML5 Weekly](#)
- [JS Weekly](#)
- [Web Design Weekly](#)

and knowing the people behind all significant projects :)

Paul Irish

我很依赖于看推特来了解最新方向, 知道接下来会流行什么, 以及他们在面临什么问题.

我旅行的时候也读 Web 相关的 RSS, 书还有杂志等等.

还有我认为实践很重要, 找点业余时间自己做个小项目, 或是给别人的项目贡献代码, 或是试下最新的工具或技术. 尝试, 失败, 成功, 分享, 重复这个流程.

Brad Frost

每个人都知道推特是个好地方, 人家会发有关最新技术的教程和博客之类的, 但是他们是从哪里学来的?

当你进步到某个水平... 你就得去读邮件列表了(mailing lists) 甚至是源代码. 你得

习惯于阅读标准(specifications), 以及参加邮件列表的讨论, 还有理解源代码. 这样才能进步.
